

Acceptance Testing

UAT Execution & Report Submission

1. Purpose of Document

This document summarizes the User Acceptance Testing scope for the completed ServiceNow employee-data management project. It follows the supplied UAT Report Template structure and focuses on the business workflow of importing employee information, updating existing employees through Employee ID matching, and reviewing the resulting records through reports and the Employee Analytics Dashboard.

2. Defect Analysis

The supplied project material does not contain a separate defect register or severity-wise defect history. Accordingly, no defect counts are invented in this report. The table records the evidence available at the time of documentation and leaves execution-specific defect counts to be updated if the team has a defect log.

3. Test Case Analysis

The project-specific UAT scenarios below cover the main functions documented for the solution. The status is recorded as 'Implemented – UAT evidence to attach' rather than falsely claiming an independent UAT pass where the supplied material does not contain signed execution evidence.

4. UAT Test Case Summary

5. Open Issues / Evidence Required

No project defect log was supplied with the source material.

UAT screenshots or ServiceNow execution captures should be attached to the GitHub repository as evidence.

Final reviewer sign-off should be completed by the actual faculty/business reviewer.

If the team has measured test results or a defect register, those figures should replace the 'Not reported' entries above.

6. UAT Evidence Checklist

Load Data / Import Set execution screenshot.

Transform Map configuration or transform-result screenshot.

Employee Test records showing newly inserted employees.

Evidence showing an existing Employee ID updated through Coalesce.

Evidence of repeated unchanged import behavior.

Employees by Department report.

Employees by Location report.

Employee List Report.

Employee Analytics Dashboard.

7. Final UAT Sign-off

8. Scope Note

The report is intentionally limited to the implemented ServiceNow scope: Excel employee data, Import Set staging, Transform Map field mapping, Employee ID-based Coalesce, Employee Test records, reports and dashboard. The supplied project material does not establish production deployment, enterprise-scale performance, or independent external acceptance, so those claims are not included.

Field	Details
Date	03 October 2026
Team ID	SWTID-2026-8740
Project Name	Employee Data Management using ServiceNow Import Sets and Transform Maps
Maximum Marks	4 Marks

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	Not reported	Not reported	Not reported	Not reported	Not reported
Duplicate	Not reported	Not reported	Not reported	Not reported	Not reported
External	Not reported	Not reported	Not reported	Not reported	Not reported
Fixed	Not reported	Not reported	Not reported	Not reported	Not reported
Not Reproduced	Not reported	Not reported	Not reported	Not reported	Not reported

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
Skipped	Not reported	Not reported	Not reported	Not reported	Not reported
Won't Fix	Not reported	Not reported	Not reported	Not reported	Not reported
Totals	Not reported	Not reported	Not reported	Not reported	Not reported

Section	Total Cases	Not Tested	Fail	Pass / Implemented
Employee Import	2	0	0	2
Data Transformation & Matching	3	0	0	3
Reports	2	0	0	2
Dashboard	1	0	0	1
Total	8	0	0	8

Test ID	Scenario	Expected Result	Status / Evidence Basis
UAT-01	Import new employee records	New employee records are created in the Employee Test table with mapped values.	Implemented; attach Load Data/Transform result screenshot.
UAT-02	Update an existing employee	An existing Employee ID is matched and its changed values are updated rather than creating a duplicate.	Implemented through Coalesce; attach before/after record evidence.
UAT-03	Repeat unchanged import	Repeated unchanged data does not create a duplicate employee record or unnecessary data change.	Implemented workflow; attach repeated-import evidence.
UAT-04	Verify field mapping	Employee ID, Employee Name, Email, Department and Location map to the corresponding target fields.	Implemented through the Transform Map; attach mapping/result screenshot.
UAT-05	Employees by Department report	The report displays employee information grouped by department.	Implemented report; attach report screenshot.
UAT-06	Employees by Location report	The report displays employee information grouped by location.	Implemented report; attach report screenshot.
UAT-07	Employee List Report	The report displays employee records available in the target table.	Implemented report; attach report screenshot.
UAT-08	Employee Analytics Dashboard	The dashboard displays the configured employee reports in one view.	Implemented dashboard; attach dashboard screenshot.

Approval Role	Name	Signature / Approval	Date
